Applicant(s)

FUTA ET AL.

Examiner

William M. Treat

Art Unit

2181

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 05 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. Claims 1-22 are presented for examination.
2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements and/or steps, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements and/or steps are: how the claimed system actually adds two numbers. Applicants claims resemble a parts list consisting of AND gates, OR gates, inverters, etc. and a conclusory statement that they represent a novel new computer design. How the elements form a novel new computer design is totally lacking from such a claim and results in a claim where the true scope and meaning are unclear. Applicants' claim 6 comes closest to claiming applicants' actual invention but there is still nothing making clear how the parts accomplish the goal set forth in the preamble to the independent claims.
4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
5. Claims 19-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
6. Claims 19-21 are for a computer program which need be nothing more than a printed listing of the program. Claim 22 is for a computer readable medium containing the program, but applicants have defined computer readable medium on page 55 of

their specification to encompass data signals. (See MPEP 2106.01 for a review of Office policy related to Computer-Related Nonstatutory Subject Matter).

7. Claims 1-13 and 17-22 are rejected as merely claiming a mathematical algorithm for adding two numbers without setting forth a practical application for said algorithm.

(See MPEP 2106.01 for a review of Office policy related to Computer-Related Nonstatutory Subject Matter).

8. Given applicants significant 112, 2<sup>nd</sup> and 101 problems, the examiner is unwilling to speculate as to what art might be appropriate to apply.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Nishioka et al. (Patent No. 7,164,765).

11. Pastor (Patent No. 5,0739,35).

12. Any inquiry concerning this communication should be directed to William M. Treat at telephone number (571) 272-4175.

13. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
